Upon reconsideration of claim 89, it is determined that "IFO 4177" is a biological depository accession number, and not merely a name of the strain. As such, the new ground of rejection below is warranted:

Claims 66-78, 83-88 and 90 are allowed.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 89 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claim requires possession of the strain designated IFO 4177 for its practice. However, as noted above, upon review it is apparent that this is a depository accession number. Applicants have not perfected this deposit as required under the Biological Deposit Rules, 37 CFR §§1.801-1.809. The name and address of the depositor is cited in the Specification at page 36, lines 22 and 23, as well as the taxonomic description, but the date of the deposit is absent, as is a statement under 37 CFR §1.808(a)(2), to the effect that all restrictions imposed by the depositor on the availability to the public of the deposited material will be irrevocably removed upon the granting of the patent. The recitation of a deposit accession number as the description for the

biological material in question requires that one of skill be able to obtain the material from the depository to practice the claim. Thus, a perfected deposit is required.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James S. Ketter whose telephone number is 571-272-0770. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Low can be reached on 571-272-0951. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
